

VIRTUAL GOD / THE BEGINNING

PREFACE

Having eaten the forbidden fruit in heaven, Eve is now cutting all our ties with reality forever by eating the forbidden fruit on earth this time.

In 1995, I was going through the books in the bookstores written by philosophers such as Budha, Plato, Socrates, Aristoteles, Shams-i Tabrizi, and Mevlana who had lived thousands of years ago. I realized that their words had shaped the foundation of our ideas and viewpoints on the creation of human beings, animals, nature and the world. This realization led me to the idea that the humanity needed period thinkers and I decided I was going to be a period thinker. The thinkers who we refer to as philosophers think about the causes of our creation and our behavior. They offer their thoughts with a holistic perspective regardless of race and gender, making us question these ideas to reach the best answers.

Technological developments have rewritten economies and societies throughout history. While the beginning of the Artificial Intelligence period, namely the Fourth Industrial Revolution, was announced at the Davos Summit in January 2016, the real revolution has been happening in humanity as it was passing from the "BELIEF" into the "COMPREHENSION" phase.

Quantum mechanics, while bringing alternative realities to the agenda, has also shown that reality can be a reflection of other things. Holographic universe models based on virtual reality and supported by artificial intelligence changed the known concepts of time and place, introducing us to new life forms. They can also explain the quantum leap with Holographic Physics. The holographic universe models although providing new answers to questions as old as human beings also give birth to never been asked questions regarding creation and the beginning.

There will be peace when everyone works in harmony for the same purpose. There will be world peace when everyone (1) unites against extraterrestrial attack or danger, or (2) would find an indisputable proof of God. This book invites people to compulsory Holistic Peace, by giving new answers to the creation and the existence of God using science and technology primarily based on a conscious artificial intelligence point of view. Let all the knowledge in your Holy Grails start moving freely.

My only claim is my sincerity.

Aydın TÜRKGÜCÜ

Thinker & Thought-Stimulator

The assumptions based on the religious and scientific creation scenarios of people who have been observing the universe with an extraordinary magnitude and diversity since the beginning that everything we perceive must be real and that a person could not have created the world are still valid today.

The period in which people believe that they did not create the universe which they have no doubts about its reality is a very peaceful period. The opposite would transform a buried ancient consciousness into a suspicion which would create a real chaos that I call the Intellectual Domsday.

The important thing is not to solve the system, but to survive it.
