The book we picked up this time is from the bookshelf of Chargé d'Affaires of Indian Embassy Dr. Ramesh Chandra. Author of the book is Turkish writer Aydın Türkgücü and the book is called *New reasons to believe in*:

Aydın Türkgücü presents a compelling reason to believe in God using the science and the traditional religions of the world. He moves you through the major scientific theories of the great master's and martyrs of many past millenniums right up to the present day.

The great search for the creator God is inevitably historic the "Creation Theories" or "Big Bang" is theory or not? This is truly questioned in this book! This enduring goal is still open and a choice for everyone to believe.

He allows you to follow the sacred verses of the Holy Books, Bible, Qur'an and Jewish Old Testament, to draw reference to the actual way God was speaking to human mind and thoughts and humanity. How? Buy either through the thoughts of the prophets or the hidden meanings of the text, which now can be revealed.

Aydın use great heroes, thinkers, scientists and many others, from the past to the present to draw influence. It is as if they with him Ataturk, Gandhi, Plato, Thales, Stephen Hawking and many others. RSB is probing their thoughts, concepts and traditions. Religion and Science go together hand in hand and Aydın lift's the lid of the heresies of the past and also the conceptual science we are taught to believe.

## REVIEWS

A research with a lofty aim to show that Religion and science are in harmony. **Prof. Salih Akdemir, Ph.D. Ankara U. Faculty of Divinity**

For those who are bored to hear same old approaches to "Religion and science" this book comes along with a new ways to discuss the issue. **Prof. Dr. Thomas Michel, S.J., Ankara, Turkey**

The book endeavors to interrogate the reasons to believe in the transcendent beings in human life, putting the emphasis on monotheistic religions. The relation between faith and scientific evidences is the basic focus of the author. In order to achieve its aim it investigates the hints provided by the Holy Writ and the Koran in the light of technological and scientific knowledge. **Prof. Ahmet İnam, Ph.D. Professor, Chair The philosophy department at METU**

Nice example of worship by thinking. **Prof. Beyza Bilgin, Ph.D Ankara U. Faculty of Divinity**

In his new book, Aydın Turkgucu offers to thinking Muslims, Jews and Christians who understand their faith, (a convincing explanation of) how technology unites them in their belief in the one true God. **Geoffrey B. Evans St. Nicolas' Church, British Embassy, Ankara-Turkey**

A serious warning that makes them to thing once again those who are planning to commit with a digital justice model.  
**Y. Selim Sariibrahimoğlu, LL.D.**
